

CAPTUS First Dissemination Workshop

The CAPTUS consortium is pleased to announce the successful implementation of its first Dissemination Workshop with more than 100 participants!

The online event, organized by partner [EEIP](#) in June 2024, served as a platform for knowledge exchange and discussions on the latest advancements in CO₂ capture and utilization.

The workshop featured a keynote speech by Konstantina Plakaki from the Hellenic Ministry of Environment and Energy, followed by a detailed presentation of the CAPTUS project by Dr. Monique Bernardes Figueirêdo, Technology Project Manager at CIRCE. Participants also had the opportunity to hear from the EU-funded sister projects [SINNOGENES](#) and [FUELGAE](#), presented by Dr. Ilias Zafeiropoulos, Technology Director at UBITECH ENERGY, and Dr. Jose Miguel Campos, Scientific Researcher at CSIC, respectively.

In addition to these presentations, the workshop included an interactive survey session led by Dr. Stefano Barberis from UNIGE, where participants could engage directly with the content and contribute their insights. The results of the interactive survey can be found [here](#).

The event culminated in a panel discussion moderated by Dusan Jakovljevic, Policy & Communication Director at EEIP. The panel featured prominent stakeholders in the field of CO₂ capture and utilization, including Dr. Milana Ayzenberg, CTO of CAOX, Marine Cornelis, Executive Director of Next Energy Consumer, Filippo Gasparin, Project Manager at CINEA, and Prof. Dr. F. Pelayo Garcia De Arquer, Group Leader at ICFO.

This workshop was an excellent opportunity for researchers, industry professionals, policymakers, and the public to learn about and contribute to the cutting-edge developments in CO₂ capture and utilization technologies.

Thank you very much again to all speakers, panelists, moderators and participants for a really interesting exchange!

The recording of the full event is available on the CAPTUS YouTube channel [here](#).
